

Meet us & our ambitions

2021

Who am I?

Wageningen University

- Animal Sciences | Animal Nutrition & Adaptation Physiology

Provimi-Cargill

- Technical-commercial manager Mediteranean (Swine specialties)
- Technical advisor Netherlands B2B and B2F

Joosten – young animal nutrition

- Global Product Manager (50+ countries)

LOOP

- Business Development & Innovation Manager
- Manager Quality, Nutrition & Sustainability
- Member Management Team
- *Passion 4 nutrition & circularity*

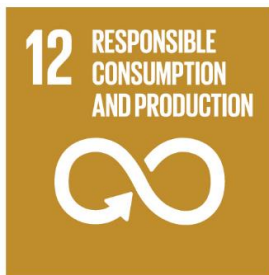

We are a hub for organic co-products and
we valorize co-products in different markets

Suppliers, customers and partners: we connect and close the loop.
With our no-nonsense approach to problem-solving.

Our vision

“Our dream is to live in a 100% circular world where waste no longer exists.”

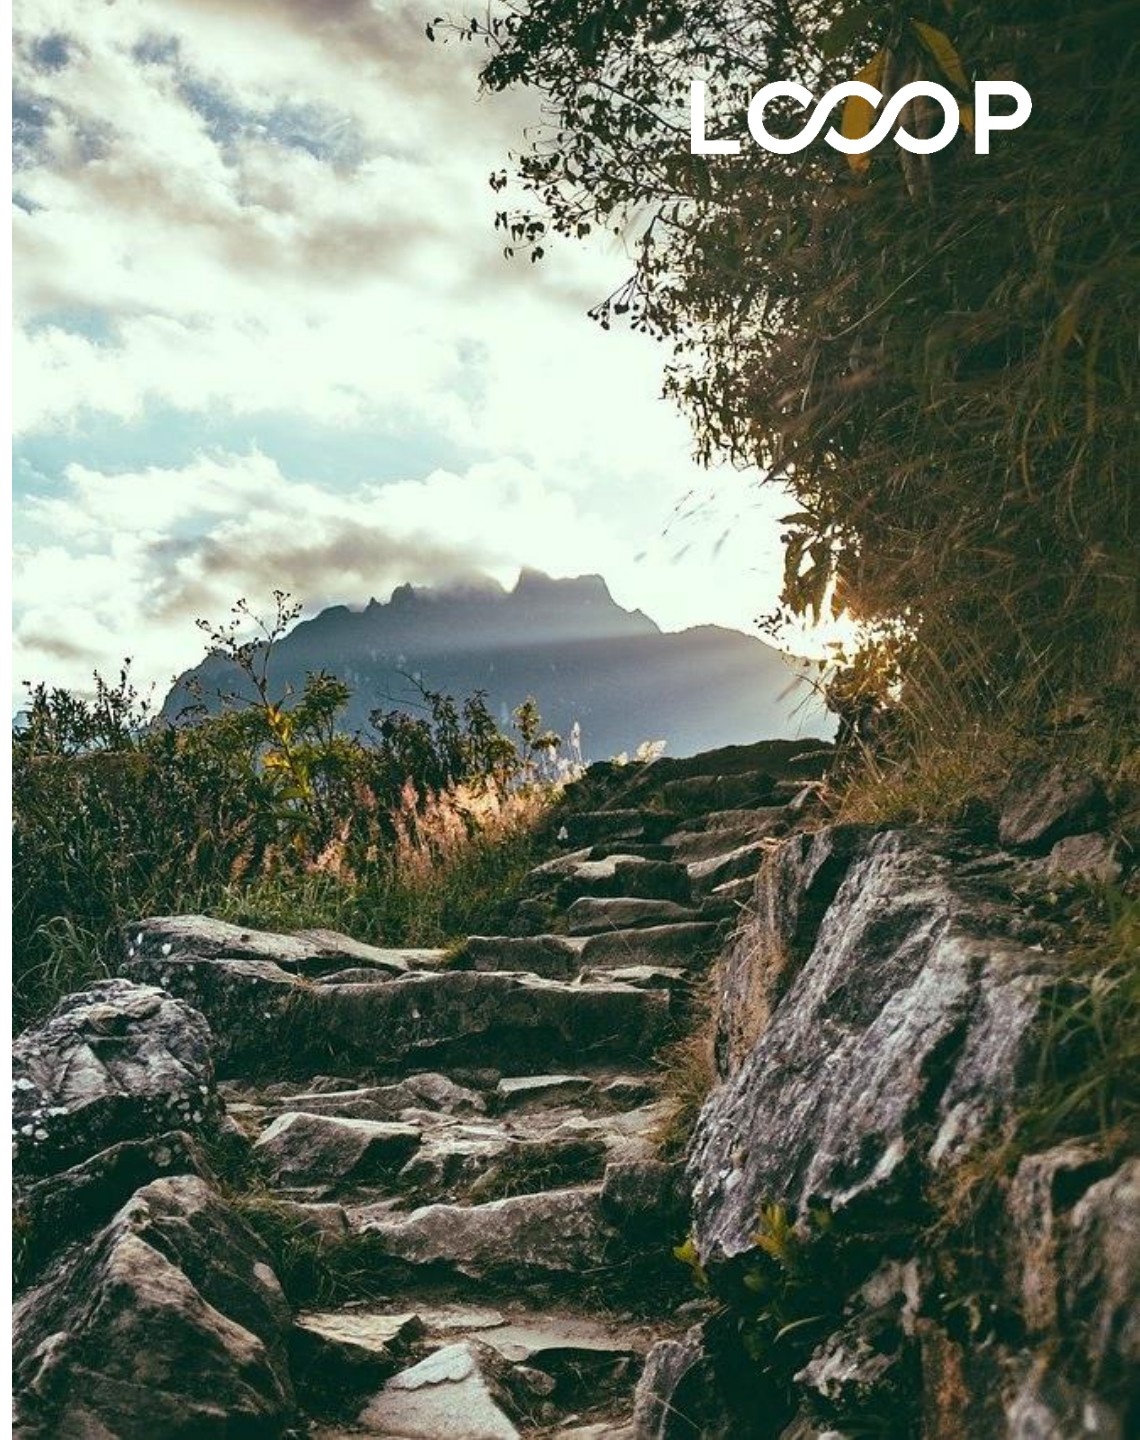

Our mission

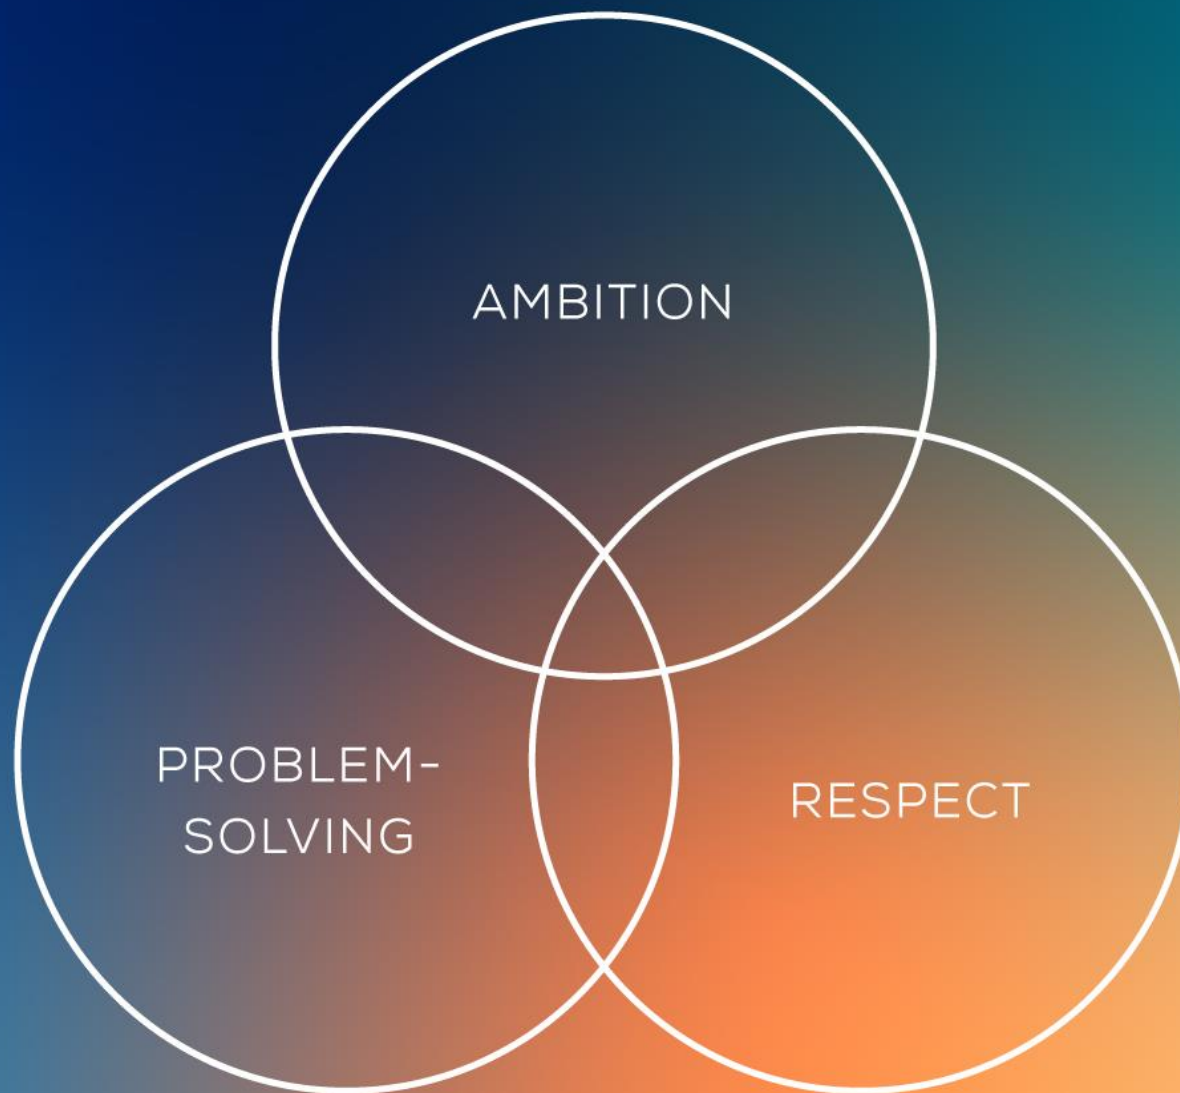

We are your independent partner who offers sustainable solutions to value en re-use organic co-products*. In this way we make an important contribution to the circular economy and society.

Suppliers, customers and partners: we connect and keep raw materials moving. With our solution-oriented approach, we support partners to improve their circular business operations. *Moving circularity forward*

**organic co-products are food waste or residual organic streams coming from food or fermentation industry.*

OUR CORE VALUES

WE CLOSE THE LOOP

Everything we do is geared towards creating a smooth, circular supply chain that keeps organic co-products moving. From transforming leftovers into valuable raw materials to being a versatile and efficient link between customers and suppliers: we are proud of every move.

WE NEVER STOP IMPROVING

What works well today, can be done even better tomorrow. We convert all sorts of organic co-products into ingredients for animal nutrition, sustainable energy sources, and innovative, bio-based products. This results in less organic waste, reduced emissions, clean energy and healthy agriculture. And because of that, we can proudly declare that we contribute to the United Nation's Sustainable Development Goals: Responsible Consumption (SDG 12) and Partnerships for the Goals (SDG 17). Our operations are digitized and highly efficient, and we rise to every challenge. We think outside the box and consistently come up with new solutions. Challenge us!

WE ARE A PARTNER YOU CAN RELY ON

Our roots in the agriculture and food industries run deep. We do not only speak your language, but we also know what's important for your operation. Our no-nonsense approach to problem-solving, own specialized logistics company, fast and flexible response to your needs, and transparent methods make us a partner you can rely on.

MOVING CIRCULARITY FORWARD

“Loop helps companies ‘closing the loop’
and stimulates dynamics;
to keep organic co-products moving in the cycle.
In a circular world, everyone benefits.”

Organic co-products

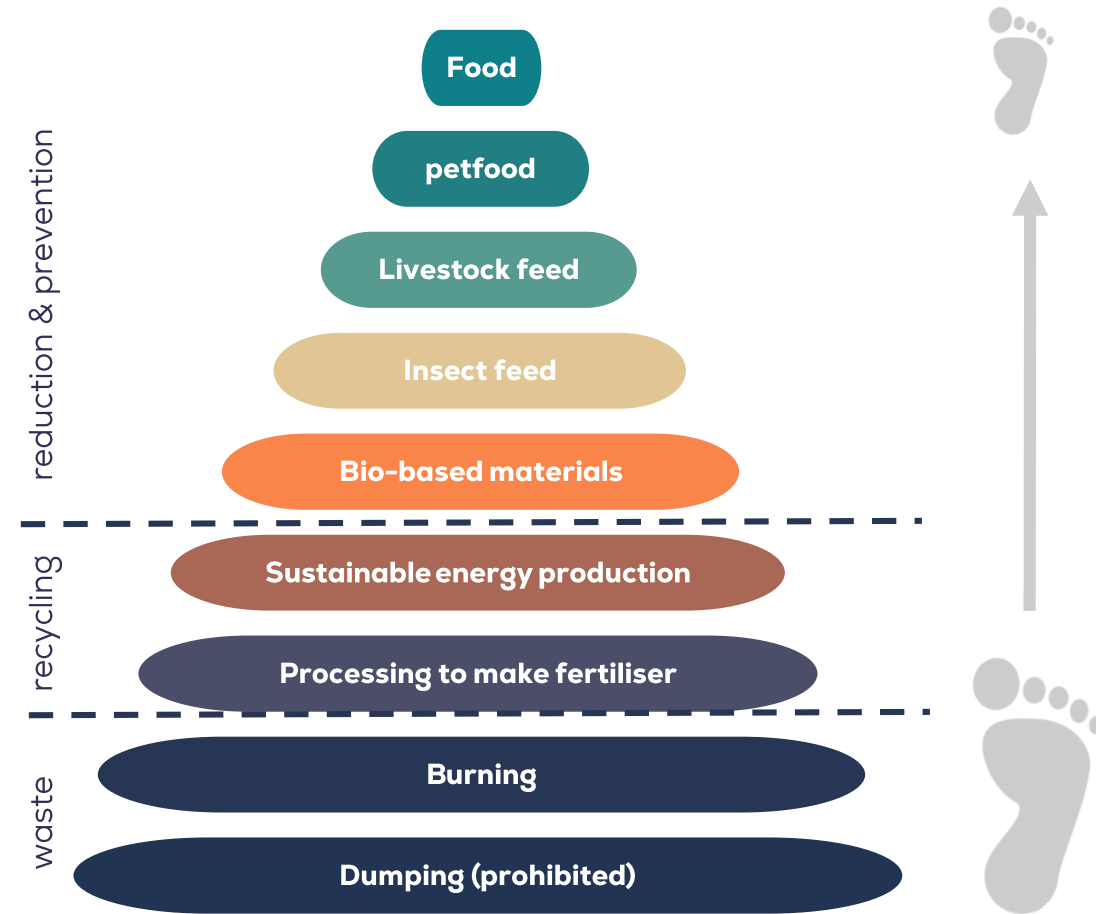

Food waste or residual organic streams coming from food or fermentation industry.

Creating new value

We maximize the potential of organic co-products and collaborate with a wide variety of partners to create a sustainable reuse cycle.

We already recover almost **2,000,000 ton** of reusable raw materials every year – and we’re just getting started.

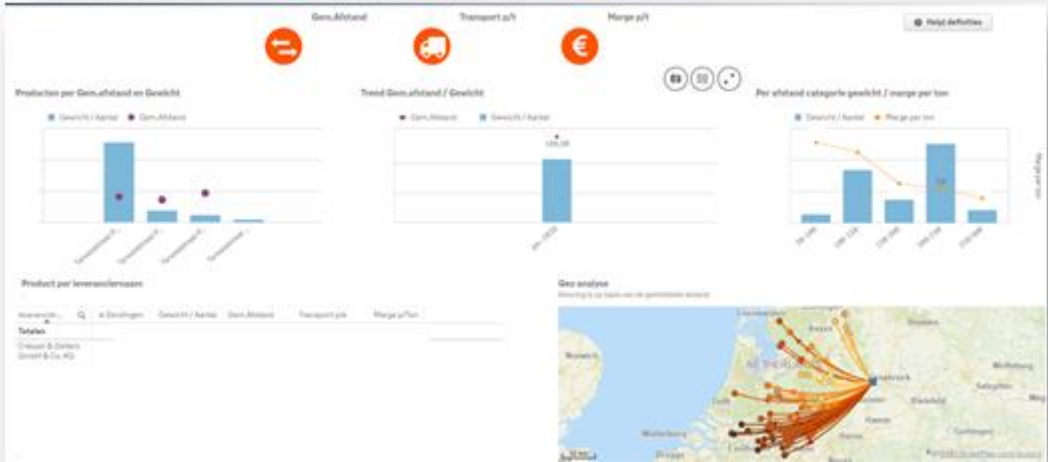

Our Partners

Digitalization

Fully digitized and automated internal processes, combined with BI to visualize the outcome.

Our knowledge partners

Brabantse Ontwikkelings Maatschappij

Carreer

Specialists in:

- Marketing
- Sales
- Procurement
